With only 5 Bioluminescent Bays in the whole world, this is a not-to-miss activity on your next visit to Puerto Rico. Laguna Grande in the town of Fajardo, on the east side of the island is the host of the most visited bio bay in Puerto Rico (We have 3 Bio Bays in PR!). This night tour is perfect for families, couples, and solo travelers. On this two-hour experience, you will learn about the Pyrodinium Bahamense, microscopic plankton capable of producing natural light at the touch of your hand. Watch how every stroke of your paddle leaves behind a glowing swirl of blue light, and fish light up their path like shooting stars in the water. This is not a tour; this is pure magic!!

The bioluminescence is a natural phenomenon, and its intensity (brightness) is unpredictable and may vary from one day to another, we cannot guarantee visibility.
