

Bio

Dr. Dwedor W. Ford is a highly accomplished scholar and leader in kinesiology and physical education. Currently serving as Division Director and Assistant Professor at Prairie View A&M University, she is known for her strong vision and commitment to academic excellence. Dr. Ford's leadership has significantly shaped curriculum development and faculty mentorship, aligning her division's goals with institutional priorities and enhancing the overall student experience.

Her research focuses on disability sport, health education, and human performance, making her a leading voice in these areas. Dr. Ford has published numerous articles in national journals and presented her work at prestigious conferences. Her research often addresses critical issues, including the participation of children with disabilities in sports and the role of AI in student engagement, reflecting her forward-thinking approach to education.

In addition to her academic and research accomplishments, Dr. Ford is committed to securing external funding to support innovative projects and initiatives. She has successfully led and participated in numerous funded grants, including projects focused on faculty development, student success, and advancing physical and occupational therapy programs. Her grant work reflects her ability to translate academic research into practical applications that benefit both her institution and the broader community. Dr. Ford's dedication to expanding opportunities for students and faculty alike positions her as a dynamic leader committed to the future of kinesiology, physical education, and health sciences.

Beyond her academic achievements, Dr. Ford actively contributes to her professional community through committee service and leadership roles in national organizations such as the National Alliance of Kinesiology in Higher Education. Her dedication to fostering inclusive environments for both students and faculty has earned her recognition across the academic landscape, and she remains a powerful advocate for innovation in education and sport.
